N

Blue Granite Water Company Public Hearing 1/27/2020

My name is Bruce and we live in Lexington SC. This whole scenario plays out like a version of the 1971 movie "Chinatown" with Jack Nicholson...intrigue regarding water rights.

I would like to present some facts and figures regarding water and sewer services based on several government surveys.

US Average Water & Sewer Cost

- The current 2018 US national average cost (5,000 gallons) for water and sewer in \$70/month.
- The average US cost in 2010 is \$44. An average annual increase of about 3.25%

Current Blue Granite Statistics

- · Blue Granite has 30,000 customers in South Carolina. A minor player in the state
- Company changed their name to improve their image according to the media in 2019. Carolina Water Service last had a Google 1-star rating, out of 5 stars
- The last Blue Granite rate case was effective 11/2017 (26 months ago)

Proposed Changes

- The company is requesting a rate increase for 2020 of 45% for water and 55% for sewer service
- Blue Granite currently appears to be substantially higher then the other 15 South Carolina service providers based on SC Municipal Water & Sewer Rate Summary
- My latest water & sewer bill adjusted to the average of 5,000 gallons is \$118/month
- Current Blue Granite rates (\$118/month) are already 68% higher then the US and SC rates (\$70)
- How can you justify your proposed increase vs the competition?
- Changing your company name to improve your image and asking for a 50% rate increase is not the solution. I would suggest turning over the service over to another more efficient provider.

Average U.S. residential price of water 2010-2018

Published by T. Wang, Aug 9, 2019

An average U.S. family of four pays about 70.39 U.S. dollars for water every month as of 2018. The price index of water and sewage maintenance have increased in recent years as infrastructure continues to age across the United States.

Water and Sewer Rates

RIA conducts an annual water and sewer rate survey to collect data for its SRF credit review function in the loan programs. The survey only covers "inside" residential rates but includes the majority of public water and sewer providers in South Carolina.

The results of the annual water and sewer rate survey serve as an invaluable tool. Water and sewer service providers have found the information useful for planning and evaluation purposes.

The rate survey is based on an average monthly usage of 5,000 gallons for a residential customer. In the past, surveys were based on 6,000 gallons average monthly usage. The change is due to a reduction in average usage by the residential consumer.

If accessing the rate information through the PDF, municipalities are listed first, followed by Special Purpose Districts and Counties. If a public provider is not shown on the survey and would like to be included, please **contact us**.
